

The founding of the laboratory solely dedicated to organ fabrication

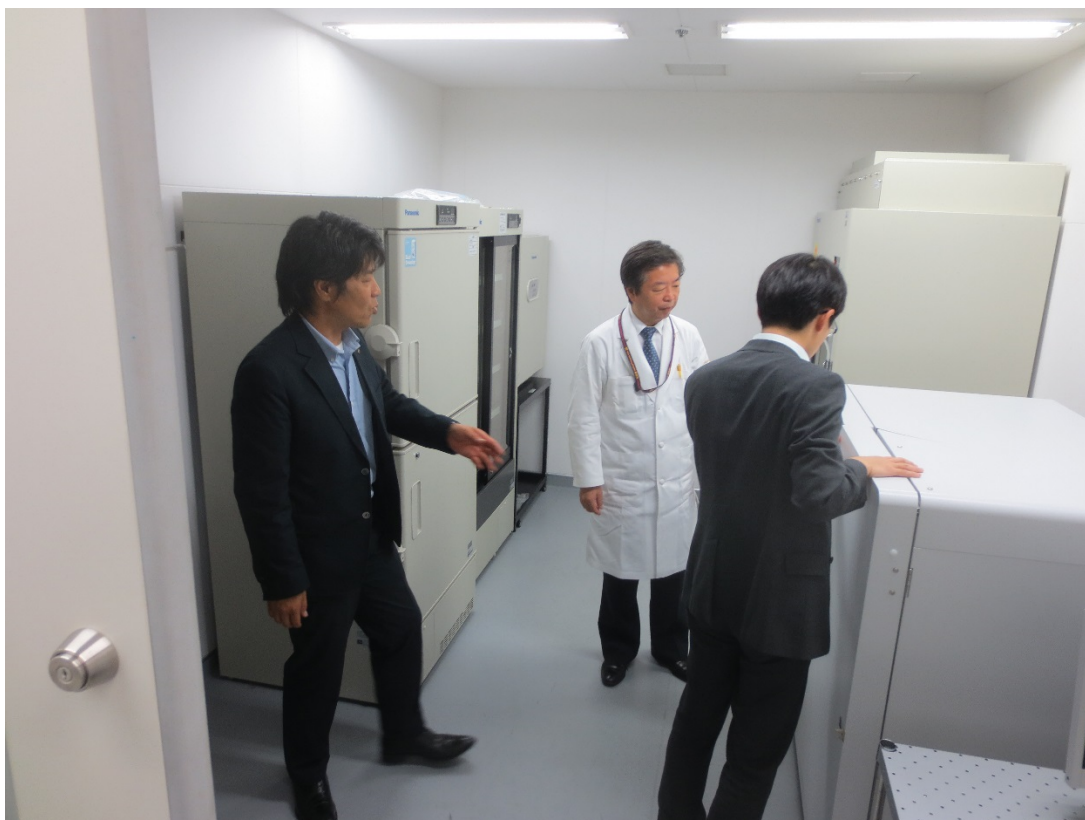

The opening of the laboratory managed by Prof. Eiji Kobayashi M.D., Ph.D. with the purpose of achieving organ fabrication without relying on donors was celebrated by Prof. Keiichi Fukuda M.D., Ph.D., Department of Cardiology, Prof. Yukou Kitagawa M.D., Ph.D., Department of Surgery, the co-research partner Sysmex Corporation and lab members on June 9th 2015 in the room 7S4 of Research Park Building, Keio University School of Medicine.

We'd like to extend our sincere appreciation to the Professors Fukuda and Kitagawa for their heartwarming collaborations for the establishment of the laboratory and Sysmex Corporation for having enthusiastically supported us as a co-research partner. The lab would not have become viable without them.
